

Thank you!

Doorstep Studio

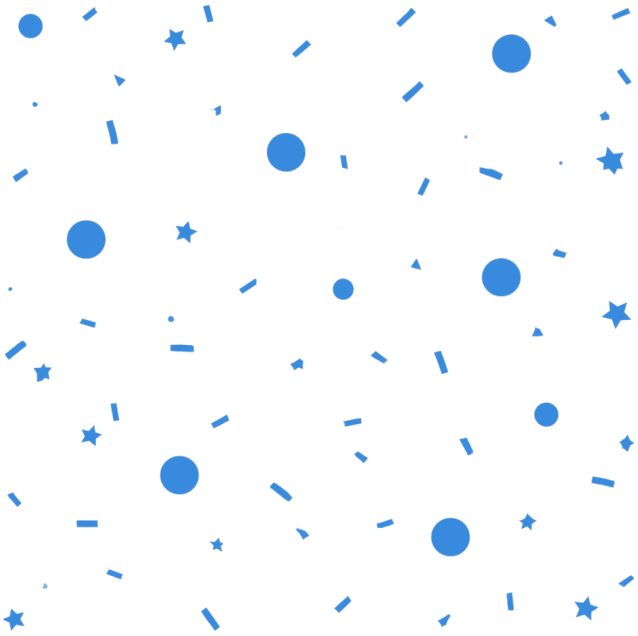

How to apply your sticker

1. Clean the bin with soapy water and dry it fully. Best above about 10°C.
2. Bend the sticker at the back cut and peel off the narrow strip of backing.
3. Line up that edge and press the exposed strip onto the bin.
4. Pull the rest of the backing away slowly, smoothing the sticker down from the stuck edge as you go.
5. Press firmly along all edges and corners.
6. Leave it 3 days before washing or scrubbing. Ordinary rain is fine.

stick the top edge, then smooth down
